**DETAILED ACTION**

***Response to Amendment***

1. The reply filed on July 24, 2006 is fully responsive to the prior Office Action as argued in your response dated November 7, 2006. The amendment has been entered.

***Response to Arguments***

2. Applicant's arguments with respect to claims 1-4, 11-15, 17-20 has been considered but is moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 11-15, 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 11 recites the limitation "the motor " in line three of claim. There is insufficient antecedent basis for this limitation in the claim. There has been no introduction of a motor in claim 1 or claim 11.

*Note: claim 5 which has been withdrawn but may be rejoined when claim 1 is allowable it also has insufficient antecedent basis for same limitation.*

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3747

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1-4, 11-15 and 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Downs et al. (US/6,453,864).

Downs et al. discloses an auto stop start system wherein resting position of engine is controlled by fuel cutting and a motor generator.

See column 4 line 37 – column 5 line 9, and claim 2.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. New prior art is cited by examiner as being pertinent to applicant's disclosure. It contains references that automatically stop and start engines.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3747

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
